THE MASTER EDGE

For almost four decades now, Master remains the most trusted name in a diverse range of high-end sanitary fitting solutions. The immense respect the brand commands, is derived from a constant trail of pioneering innovation, highest quality standards, wide range of choices and above all, real value for money.

Starting from production of faucets in early eighties, it was the instant acceptance and trust of the customers that contributed to a never-ending growth and expansion that continues even today.

Today, we are not only the largest producers of our product categories in Pakistan but also the one offering widest range of choices in highly cost effective and immensely creative products.

Constant change management and the quest to remain ahead of the competition, not only at home but also among players all around the globe, results in application of the world's most advanced and sophisticated technologies. The moving for

ce behind our research and development is to create unique product lines; convenient, reliable and durable in their function and efficient in their cost as well as performance.

As our endeavours towards making living more and more worth living continue, we are thankful to Almighty Allah and take pride in effective role we have been able to play in positively changing the lives and lifestyles of our people.

CHARACTERISTICS & TECHNICAL FEATURES

Usage of European imported Chemical for Core Making

Usage of best grade Yellow Brass for casting the Brass parts having 58% to 62% Copper and 35% imported Zink with 1% to 4% other Metals as impurities

Parts tested at 100PSI(7 bar) pressure however standard domestic pressure is 20 to 25 PSI

Usage of imported food grade Grease

Usage of stainless steel wire + EPDM/PEX Tube in our Chrome finish Toilet shower

CHROME FINISH

Upper shiny protection layer provides a mirror finish to every faucet

High plating thickness provides tolerance to extreme climate and water conditions

Salt spray testing to ensure durability and corrosion resistance of our finishes

Thickness of Nickel layer = 16 to 20 micron

Thickness of chrome layer = 0.3 to 0.5 micron

Using European imported chemical for chrome

Using Semi Bright Nickel process along with the Bright nickel process for enhancing the chrome quality of our products

High Quality Nickel coins.

Checking the chrome quality and durability on Brass parts by putting the parts in Oven for 30 minutes at 200°C

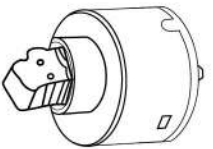

PLASTIC PARTS

- Using Special Chrome Grade ABS for chroming of the ABS parts
- Using pure High Quality ABS material. No Recycled material used for ABS parts
- Using food Grade PVC material for flexible pipes

CARTRIDGE

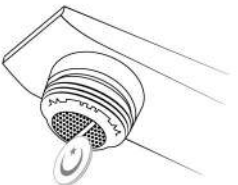

- Using worldwide certified cartridges that are 5lacs (500,000) cycles tested to give a longer and trouble free operating life of up to 20 years (considering 60-70 operations per day)
- Wide angle of lever provides ultra-comfort and flawless, smooth operation

AERATORS

DEVICE THAT MIXES AIR WITH WATER TO GIVE SOFT AND SPLASH-FREE FLOW

- Using European imported Aerators
- Using worldwide certified aerators (ISO 9001:2008, DIN EN ISO 14001:2004, DIN ISO 50001:2011)
